

# Self Energy – a modern-day ESCo

*An independent ESCo (Energy Services Company) is an expert in designing and delivering Integrated Energy Solutions to:*

- *Minimise Energy Costs*
- *Minimise Carbon Emissions*
- *Reduce total reliance on the energy grid (gas and electricity)*

*An Integrated Energy Solution is the optimal mix of proven energy efficiency and on-site energy generation technologies*

Working with UK and international investors to unlock energy efficiency potential in UK market.

Industry-leading management and technical expertise in integrating onsite generation with energy efficiency solutions.

Leveraging European ESCO experience into the growing UK market.

Supporting the growth of energy services capabilities in variety of building and portfolio types – public and private sector, including support of several RE:FIT projects.

## Can an ESCo partnership benefit your building?

- ✓ Is there a need and opportunity to save energy costs?
- ✓ Are there technology or commercial barriers to delivery of energy improvement projects?
- ✓ Is there a short to medium term understanding of the ownership structure of the buildings in question?
